DUBLIN, Ireland, July 30, 2015 — Alkermes plc (NASDAQ: ALKS) today reported financial results for the second quarter of 2015.

"With the PDUFA date for ARISTADA™, our proposed brand name for aripiprazole lauroxil, just a few weeks away, we are in the midst of final launch preparations for this important potential new treatment option for patients with schizophrenia. Our field sales force is in position, our comprehensive patient support services are ready and launch quantities have been manufactured," said Richard Pops, Chief Executive Officer of Alkermes. "ARISTADA, our long-acting atypical antipsychotic product candidate for schizophrenia, is leading the next wave of Alkermes' emerging blockbusters that offer innovative treatment options for chronic CNS diseases that affect millions of people. Our late-stage pipeline of product candidates, including ALKS 5461 in depression, ALKS 3831 in schizophrenia, and ALKS 8700 in multiple sclerosis, has been purposefully designed to address areas of major unmet medical need and to be responsive to today's regulatory and payer environments."

"Our second quarter financial results were driven by the strong revenues from our core portfolio of commercial products, important investments in the development of our late-stage CNS pipeline and the launch preparations for ARISTADA," commented James Frates, Chief Financial Officer of Alkermes. "Today we are improving our financial expectations for the remainder of 2015, driven by the accelerating quarterly growth in net sales of VIVITROL*, our long-acting injectable medication for the treatment of opioid dependence and alcohol dependence."

Non-GAAP Financial Measures

This press release includes information about certain financial measures that are not prepared in accordance with generally accepted accounting principles in the U.S. (GAAP), including non-GAAP net income or loss, non-GAAP diluted earnings or loss per share and free cash flow. These non-GAAP measures are not based on any standardized methodology prescribed by GAAP and are not necessarily comparable to similar measures presented by other companies.

Management defines its non-GAAP financial measures as follows:

- •Non-GAAP net income or loss adjusts for one-time and non-cash charges by excluding from GAAP results: share-based compensation expense; amortization; depreciation; non-cash net interest expense; non-cash tax expense; deferred revenue; and certain other one-time or non-cash items.
- · Free cash flow represents non-GAAP net income or loss less capital expenditures.

The company's management believes that these non-GAAP financial measures, when viewed with the company's results under GAAP and the accompanying reconciliations, better indicate underlying trends in ongoing operations and cash flows. However, non-GAAP net income or loss, non-GAAP diluted earnings or loss per share and free cash flow are not measures of financial performance under GAAP and, accordingly, should not be considered as alternatives to GAAP measures as indicators of operating performance.

A reconciliation of GAAP to non-GAAP financial measures has been provided in the tables included in this press release.
